

## Appendix C: Selected Web Publishing Resources

This appendix provides a very brief selection of books and Web sites related to Web publishing. Chapter 11 provides an extensive bibliography of sources in community information networking.

Web sites provide an astonishingly complete amount of content about Web publishing; however, most of us find reading detailed information on the Web somewhat challenging. Still, Web developer sites can also offer items not easily found in books: interactive tutorials, snippets of code, and information on the latest changes in technology. Thus most Web site builders use a combination of printed materials and online resources.
